

Introduction

Inventory Physical Adjustment Plug-in is an add-on function for AutoCount Accounting user to perform stock take and adjust the quantity in the system automatically through Stock Adjustment.

System Requirement & Installation

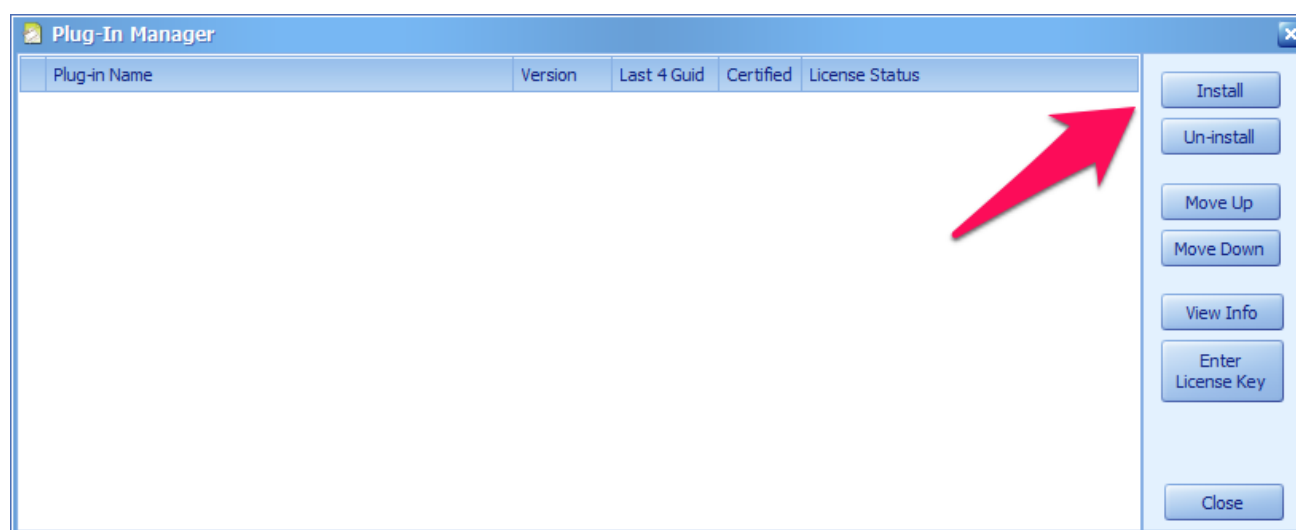

In order to install Inventory Physical Adjustment Plug-in, user will need to obtain .app file which is used for installation.

AutoCount Accounting System Requirement

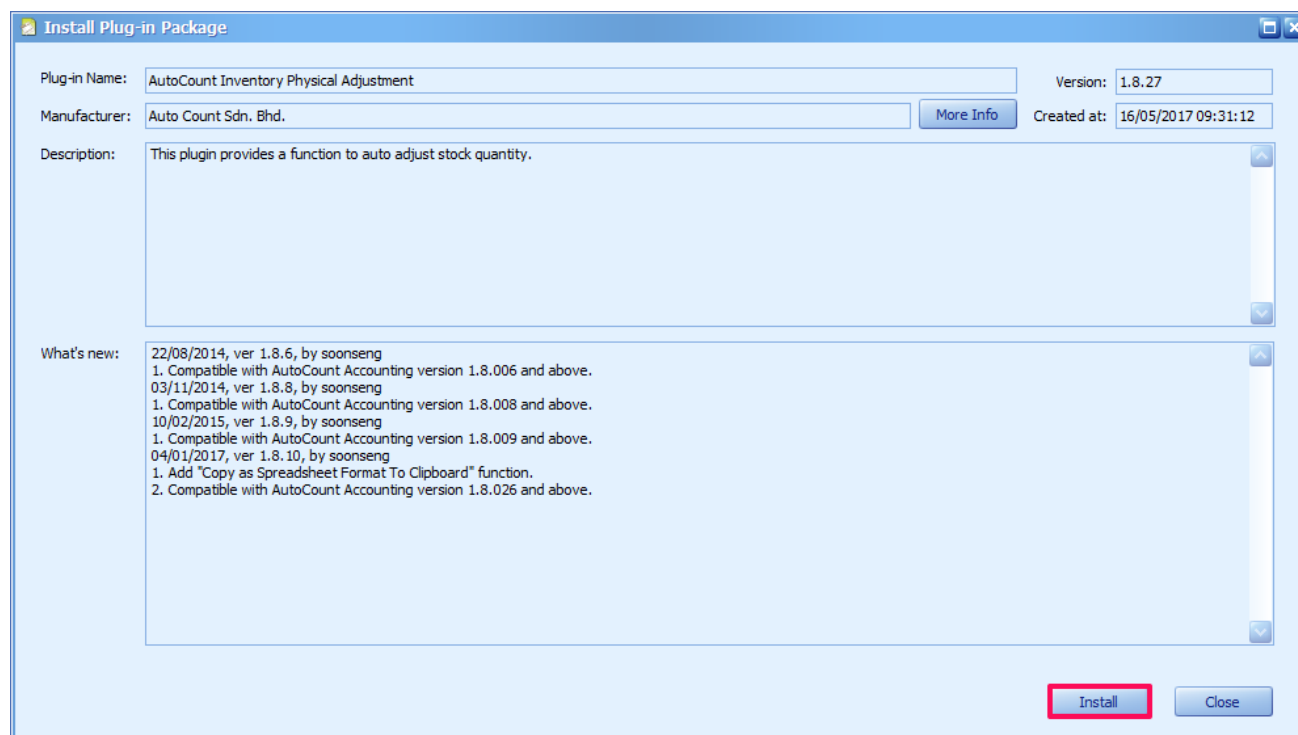

- AutoCount Accounting Basic Edition and above
- Scripting Module

Step by step guide for installation:

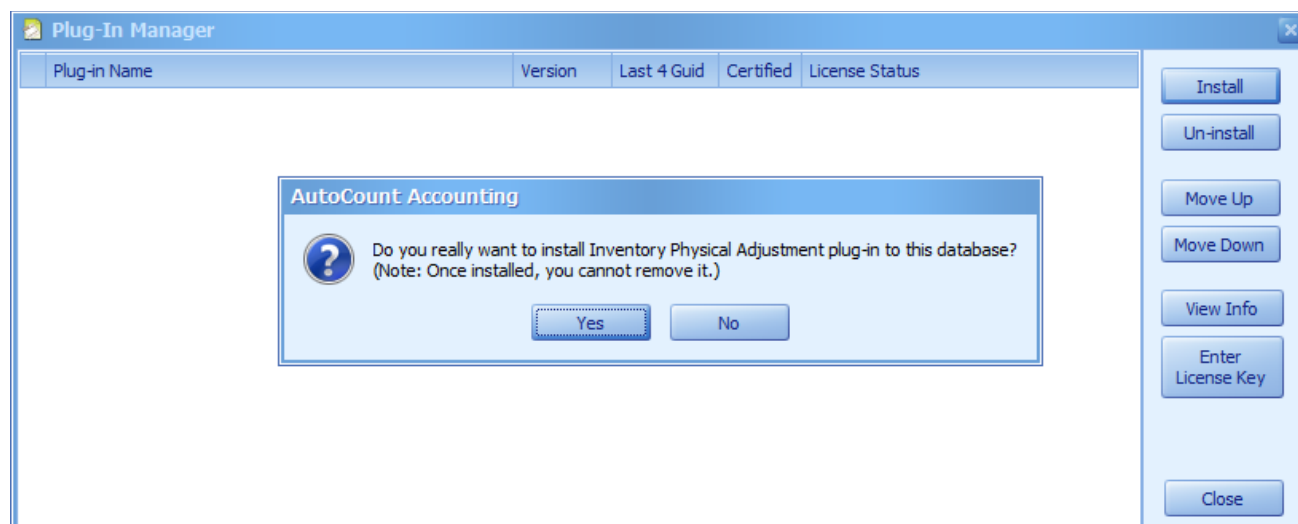

1. Launch AutoCount Accounting and login the account book which you wish to install this plug-in.
2. From the menu bar, go to Tools → Plug-in Manager.

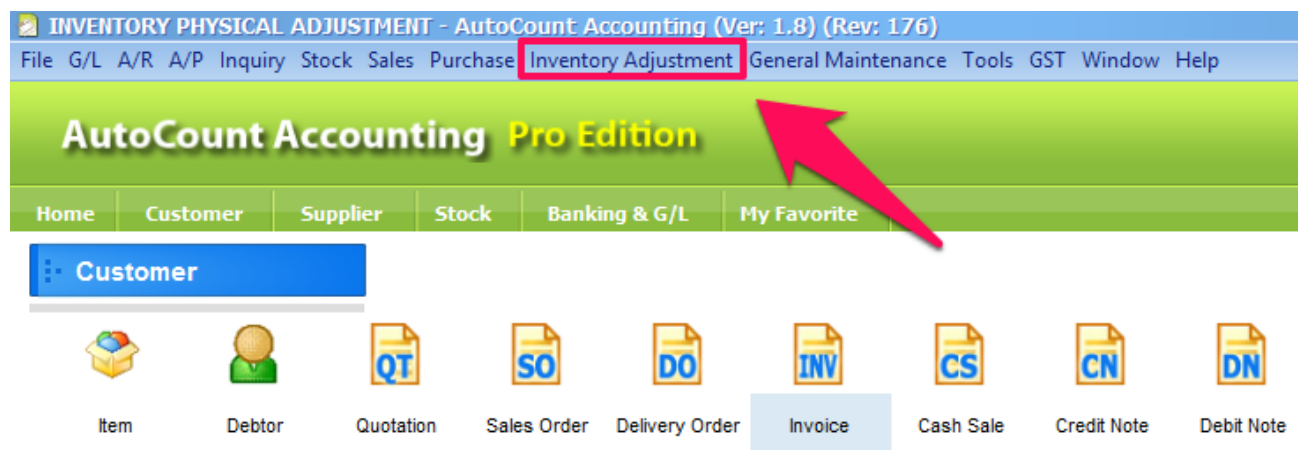

3. After opening Plug-in Manager, click on the "Install" button located on right hand side, system will prompt to select a file. Please browse from folder and open the .app file.
4. A new window will prompt with some basic information of this plugin. Click the "Install" button again located at the bottom.

5. A confirmation message will prompt after clicking the "Install" button. Click "Yes" in order to confirm the installation.
6. Inventory Physical Adjustment plug-in needs to add additional tables or fields onto existing database, message will prompt to notify and again ask for confirmation to continue the installation.

7. After clicking "Yes", the installation will start and after a moment if the plug-in is installed properly, a successfully installed message will appear and user just need to click "OK" to proceed.
8. After installation user will then able to see an extra menu on AutoCount Accounting menu bar. User can now access to function or features related to this plug-in.

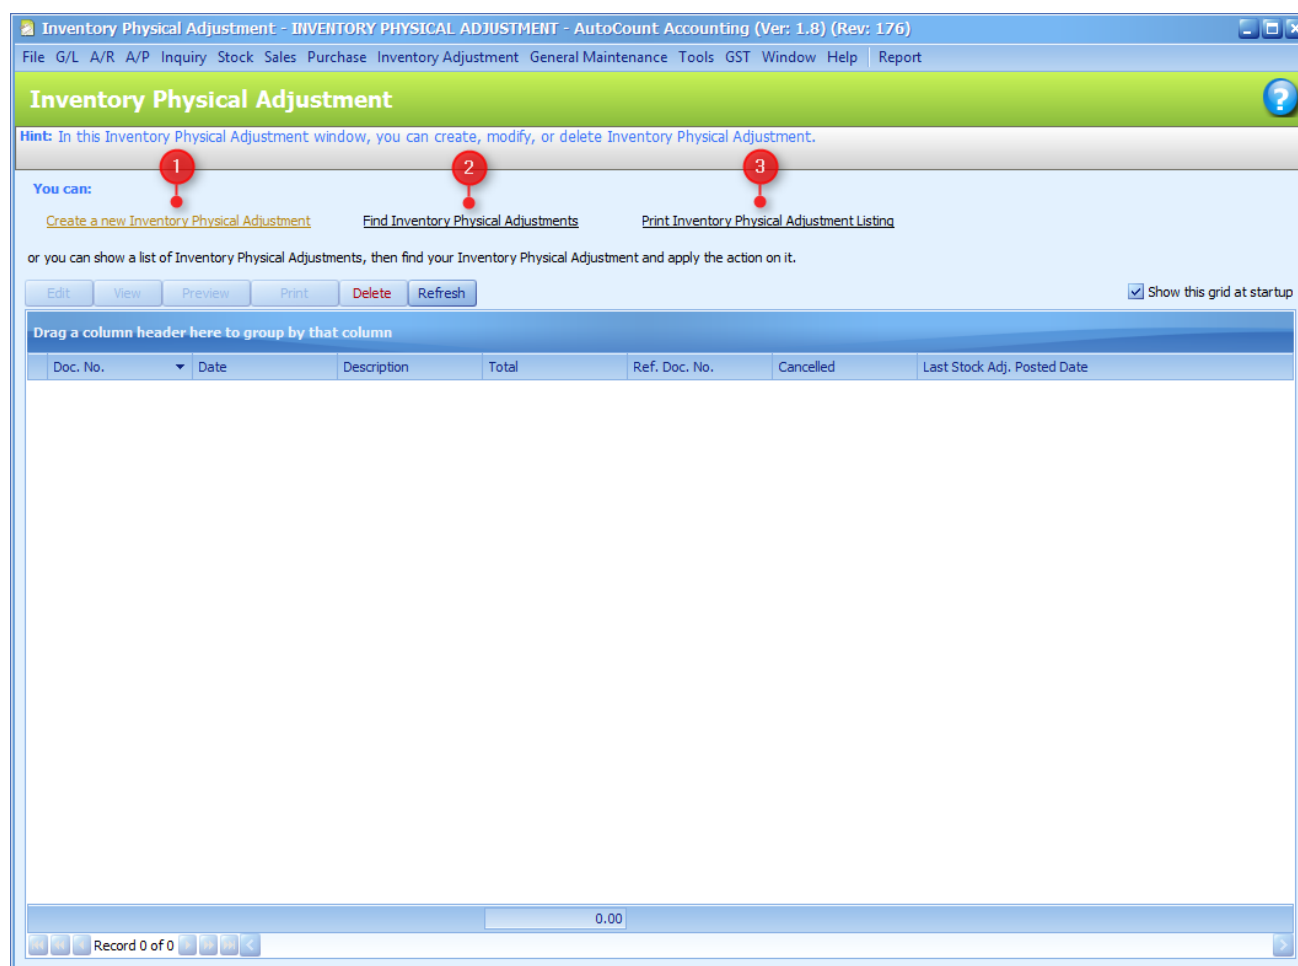

Functions & Features

After installing this plug-in, there will be a new entry – Inventory Physical Adjustment under the menu Inventory Adjustment. This entry is for user to key in their physical on hand quantity as per date or stock take result. After keying in the result, the system will compare it to the quantity of each item by UOM, by location or by batch and make necessary adjustment.

Inventory Physical Adjustment Command Form

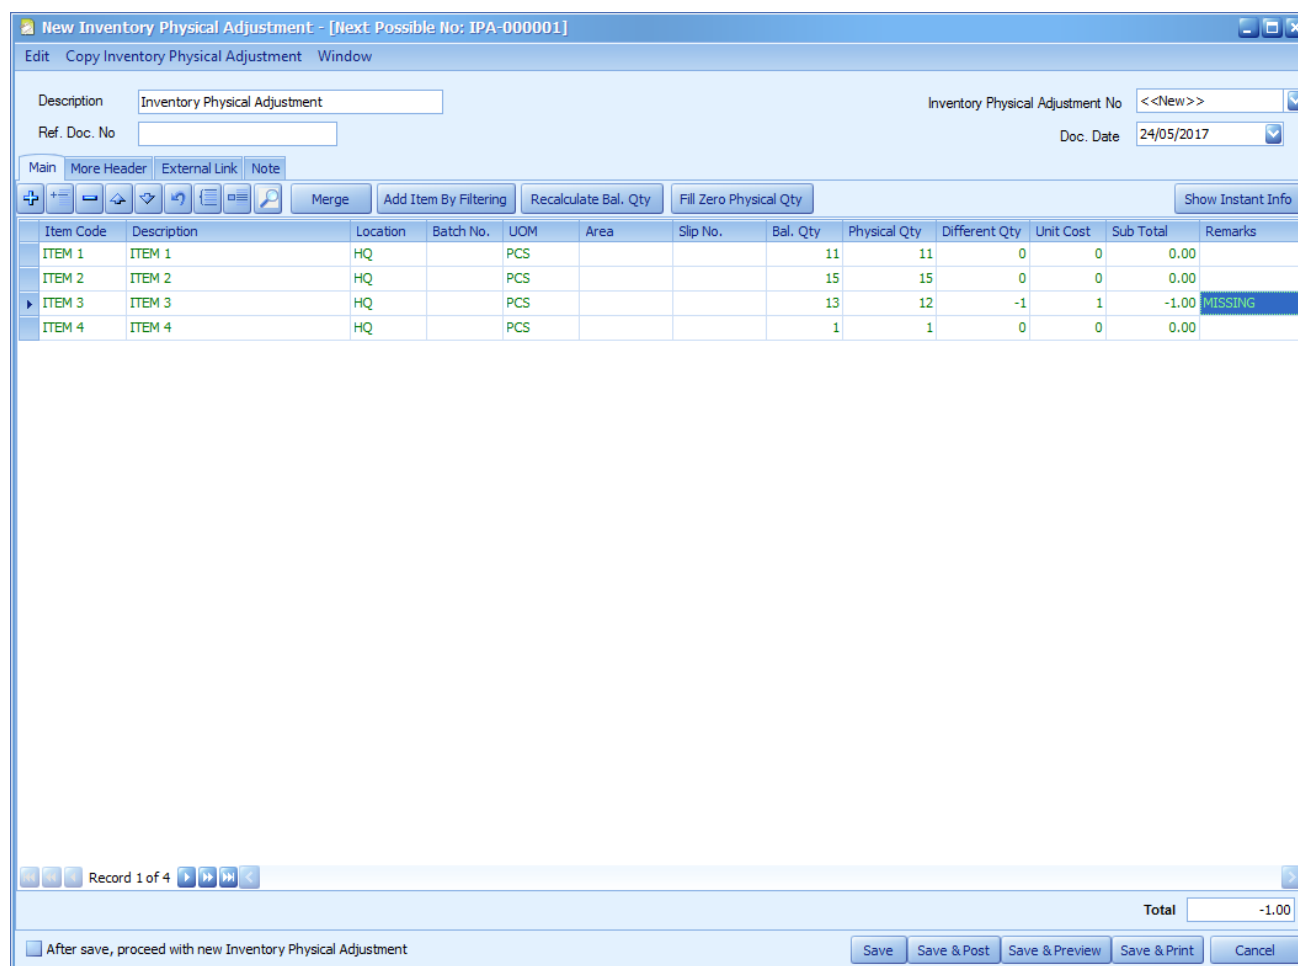

The Inventory Physical Adjustment main form had been designed to be similar to other entry forms that can be found in AutoCount Accounting.

1. Create a New Physical Inventory Adjustment: Click this to create a new Physical Inventory Adjustment.
2. Find Inventory Physical Adjustment: Click this for advance searching through Physical Inventory Adjustment Entry
3. Print Inventory Physical Adjustment Listing: Click this for batch printing / listing printing of Physical Inventory Adjustment.

Create New Inventory Physical Adjustment

To create a new Inventory Physical Adjustment entry, click on the "Create a New Inventory Adjustment" at the Command Form.

Item Code	Description	Location	Batch No.	UOM	Area	Slip No.	Bal. Qty	Physical Qty	Different Qty	Unit Cost	Sub Total	Remarks
ITEM 1	ITEM 1	HQ		PCS			11	11	0	0	0.00	
ITEM 2	ITEM 2	HQ		PCS			15	15	0	0	0.00	
ITEM 3	ITEM 3	HQ		PCS			13	12	-1	1	-1.00	MISSING
ITEM 4	ITEM 4	HQ		PCS			1	1	0	0	0.00	

Functional Buttons

Merge: This button is to merge any same Item Code, UOM, Location and Batch No at the same time delete any line where physical quantity is empty.

Add Item by Filtering: This button is to add in item through filtering so that user does not need to add it 1 by 1.

Recalculate Bal. Qty: This button is to recalculate latest balance quantity in the system.

Fill Zero Physical Qty: This button is to fill zero physical quantity for the selected / filtered item.

Save & Post: This button is to confirm the entry and allow system to post a Stock Adjustment to adjust the item quantity accordingly. A Stock Adjustment entry will prompt with the items auto filled based on this Inventory Physical Adjustment entry.

Master Columns

Description: This is the document description

Ref Doc. No: Key in any related document reference number if any.

Inventory Physical Adjustment No.: Document number for this entry. Leave <<New>> if wish to follow system auto numbering.

Doc. Date: Document date for this entry. By default will capture system / computer date.

Detail Columns

Item Code: The current selected item user working with.

Description: Detail description, it will capture the item description automatically.

Location: The location of current line item. This column is only visible if Multi-Location module is enabled.

Batch No.: The batch number of current line item. This column is only visible if Batch No module is enabled.

UOM: Unit of measurement, the default value will be automatically captured.

Area: Area for this item. This is a free text and reference field only.

Slip No.: Slip number for this item. This is a free text and reference field only.

Bal Qty: The balance quantity of item in the system.

Physical Qty: The physical quantity / actual quantity of user according to date. This column is to be filled by user.

Different Qty: The different between physical quantity and balance quantity in the system. The system will automatically make adjustment according to this quantity, either + or -.

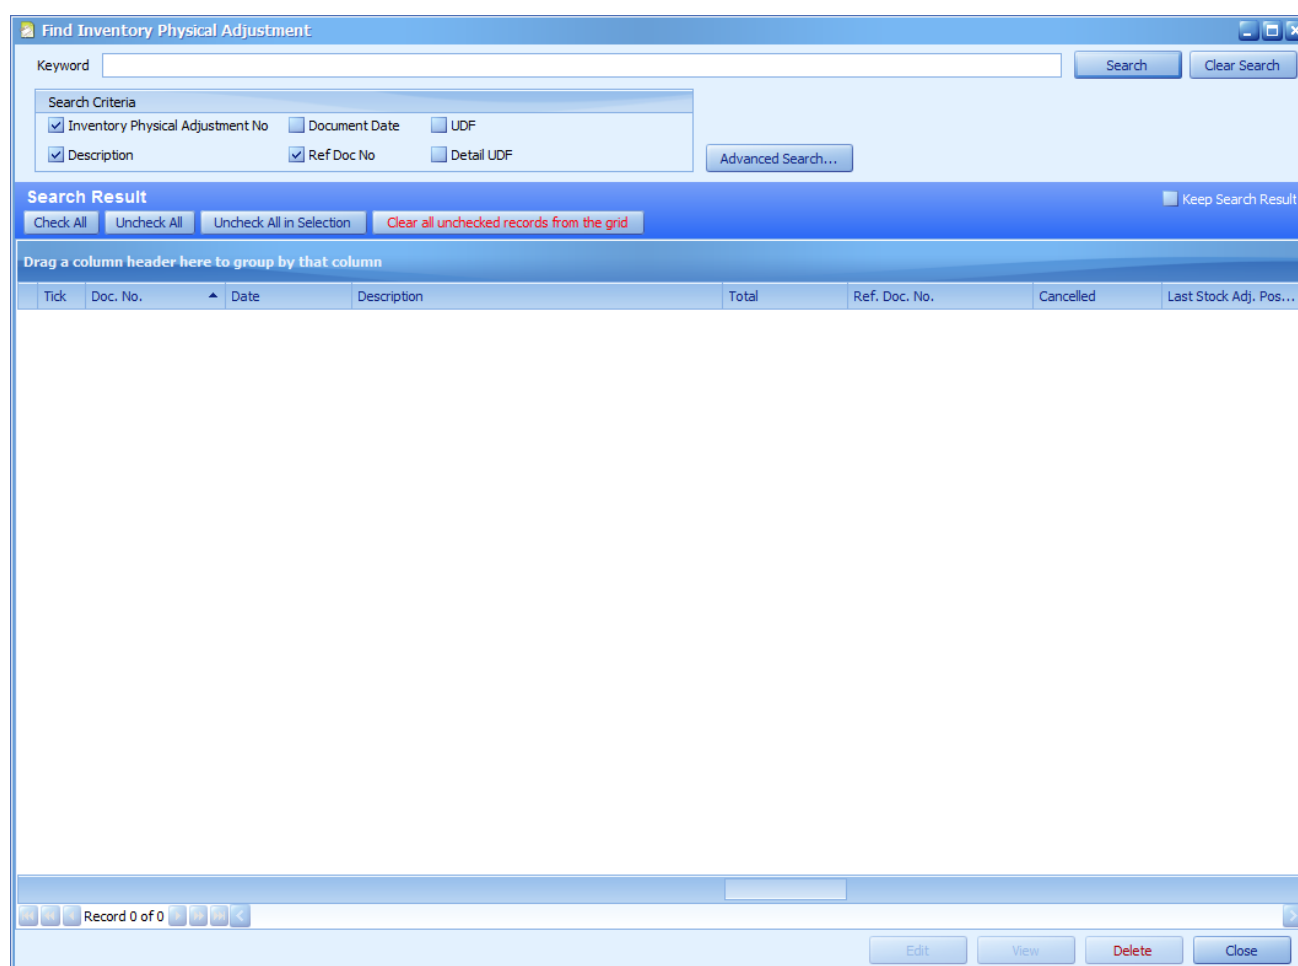

Unit Cost: The unit cost of the item.

Subtotal: This is the line total.

Remarks: Any additional information for this line item.

Find Inventory Physical Adjustment

For advance searching in Inventory Physical Adjustment entries, user can access the "Find New Inventory Physical Adjustment".

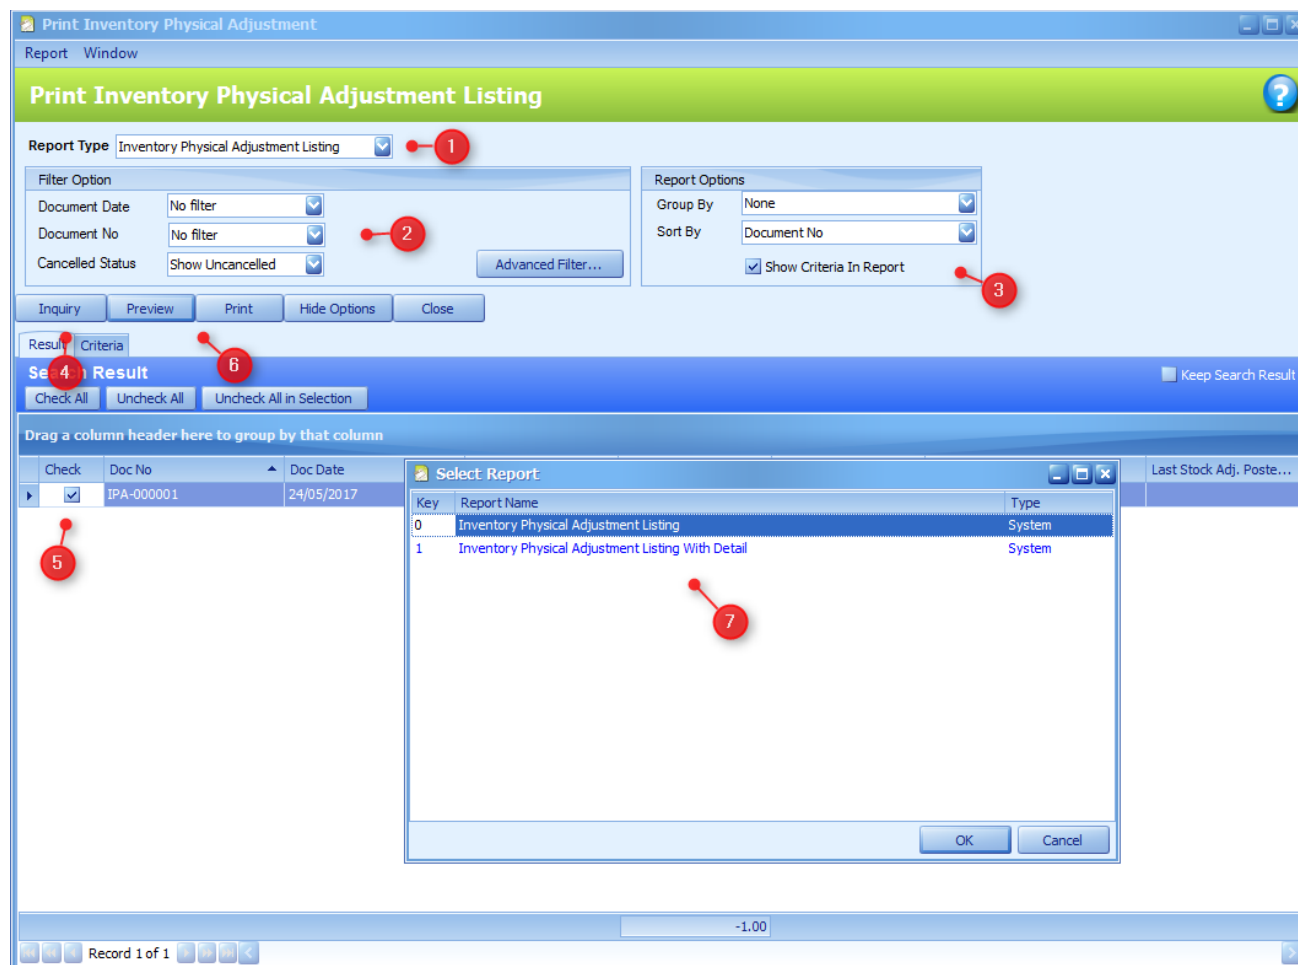

Key in key word and tick whichever search criteria that are needed and click Search. The system will able to search through all the Inventory Physical Adjustment entries and return search result. Advance search is also available if the general search criteria are insufficient to the user. User can also edit or delete multiple entries at this page by checking the selected search result.

Batch Print Inventory Physical Adjustment / Print Inventory Physical Adjustment Listing

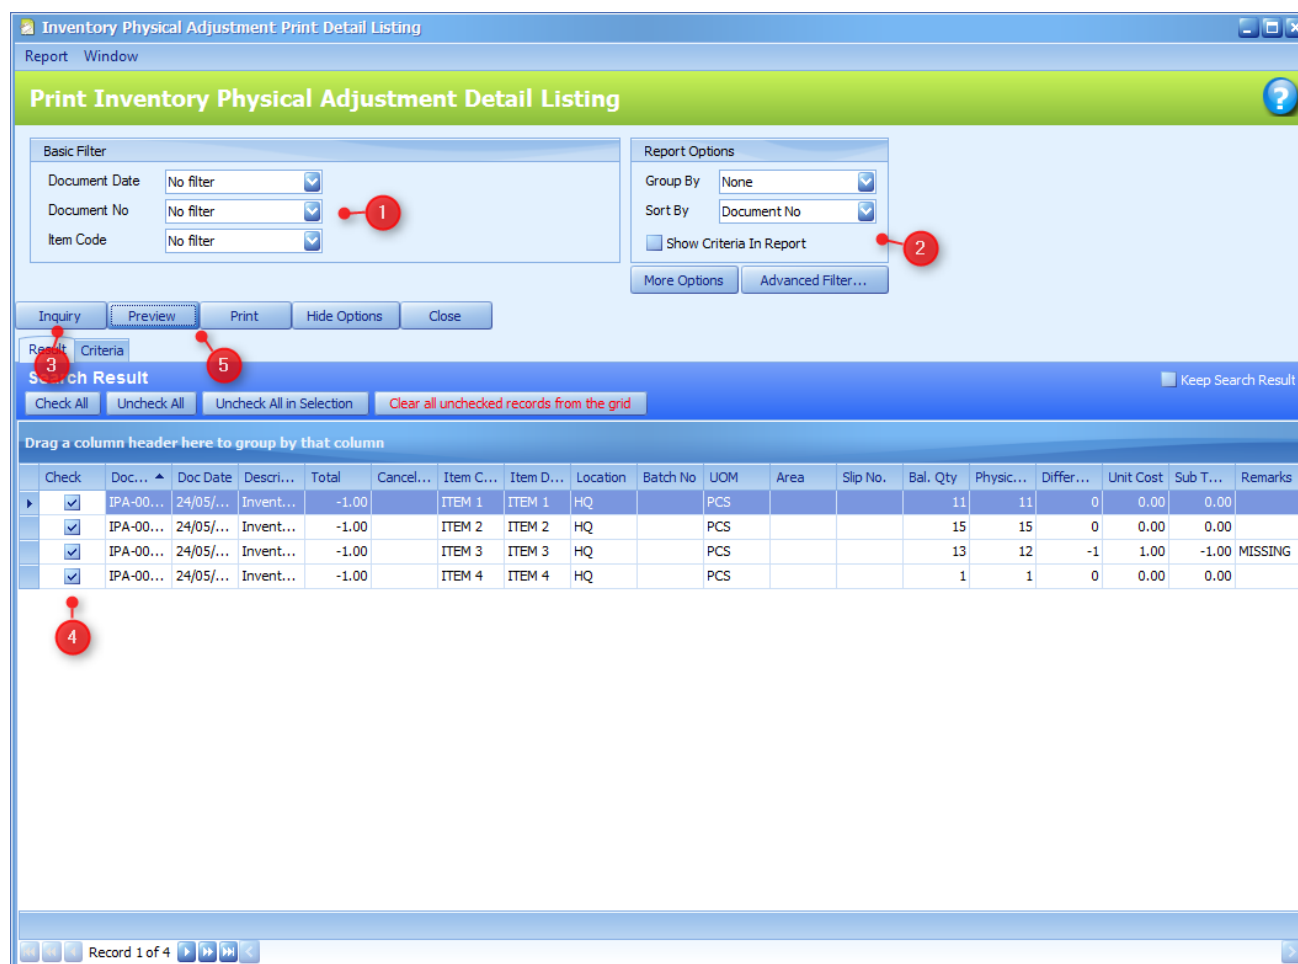

The screenshot shows the 'Print Inventory Physical Adjustment Listing' window. It includes a 'Report Type' dropdown set to 'Inventory Physical Adjustment Listing' (1). Below are 'Filter Option' and 'Report Options' sections. 'Filter Option' has dropdowns for 'Document Date' (No filter), 'Document No' (No filter), and 'Cancelled Status' (Show Uncancelled), with an 'Advanced Filter...' button (2). 'Report Options' has dropdowns for 'Group By' (None) and 'Sort By' (Document No), and a checked 'Show Criteria In Report' checkbox (3). Action buttons 'Inquiry', 'Preview', 'Print', 'Hide Options', and 'Close' are present. Below these are 'Result' and 'Criteria' tabs, with 'Result' selected (4). Under 'Result', there are 'Check All', 'Uncheck All', and 'Uncheck All in Selection' buttons (6). A table with columns 'Check', 'Doc No', and 'Doc Date' is shown, with one record 'IPA-000001' dated '24/05/2017' (5). A 'Select Report' dialog box is open, showing two options: 'Inventory Physical Adjustment Listing' (Key 0) and 'Inventory Physical Adjustment Listing With Detail' (Key 1), both of type 'System' (7). The dialog has 'OK' and 'Cancel' buttons. The status bar at the bottom shows 'Record 1 of 1' and a value of '-1.00'.

1. Select Report Type.
2. Define Filter Criteria.
3. Select Report Option.
4. Click Inquiry to get result.
5. Tick on record for further action.
6. Click preview or print for previewing or hard-copy printing.
7. Select format / template of the report type to be preview or print.
